

```
#####  
Cloud Formation (IaaS)  
#####
```

-> AWS providing infrastructure as a service ( IaaS )

-> We can create resources in AWS cloud in multiple ways

1) Web Console (GUI)

2) AWS CLI

3) Cloud Formation ( IaaS)

4) Terraform (IaaS) ---> Third Party S/w & supports for all most all cloud platforms

=> AWS CloudFormation is an infrastructure as code (IaC) service that allows you to easily model, provision, and manage AWS and third-party resources.

=> We can write Cloud Formation scripts in 2 ways

1) YAML

2) JSON

Note: We can create YAML / JSON files in AWS Cloud Formation Designer

=> We can access Cloud Formation Templates using below URL

<https://docs.aws.amazon.com/AWSCloudFormation/latest/UserGuide/sample-templates-services-us-west-2.html>
